

CONCORD FOODS

Food Manufacturing Ingredient Product Guide

About Concord Foods & Oringer

Founded in 1918, Oringer (a division of Concord Foods) has become a leading supplier of ingredients for applications in the food service, confectionery, nutrition bar, ice cream, dairy and bakery industries. Oringer's product range includes beverage bases, fountain syrups and toppings, confectioners' fillings, variegates, stabilized fruits, fruit purees and chocolate flavors.

Oringer ingredients enhance some of the country's most famous brands. As one of the largest private manufacturers of caramel in the United States, we have developed caramels for every application, from chewy to liquid to organic and sugar free. Our in-house Research and Development team can formulate ingredients to meet the functional and physical requirements of any application. Whatever texture, protein level, flavor or viscosity is called for, our specialist team can design the product.

We also excel at manufacturing chocolate and fruit based ingredients. Our reach is extensive, so if you require a specialty item such as pumpkin flavored syrup or cake batter ice cream flavoring, we can help.

Oringer's proprietary technologies enable us to guarantee absolute control over the final product. We monitor every step between development and delivery in our state-of-the-art, 255,000 square foot manufacturing facility in Massachusetts.

Speak with an Oringer representative and let us show how our experience and technology can serve you.

CONFECTIONERY
